

**MiRec** and **DiRec** are video recommendation applications. You are asked to perform the following 2 tasks, and later to evaluate your experience through a post experiment questionnaire.

In MiRec, you will only be using the iPhone device. In DiRec, you will be using the iPhone plus an external LD screen (only as output).

Please ask any questions you have.

## Task 1:

Please complete the following steps on MiRec.

0. Optional (Skip if done in other app version): In “Sign Up” page, fill in name and email. Click next. Rate your preferences. Click done.
1. In the “Home” page, navigate through the recommended videos and select a video that interests you by clicking on the detail indicator “>”.
2. In the “Details” page, investigate the video details. Click on “>>” in the bottom right corner to read video description.
3. While on “Details” page, click the play icon on the video image to play the video.
4. When the video is done, or if you want to stop the video, click “Done” on top left corner of the player page. You should then be directed to the rating page.
5. On the rating page, rate the video you just watched (or partially watched). Optionally enter a review, then click “Back To Videos”.
6. When back on the Home page, click on the menu icon on the top left corner on the navigation bar.
7. Select a category that interests you.
8. Optional: select a video to play from categories list.

## Task 2:

Please complete the following steps on DiRec.

0. **Sign up:** Optional (Skip if done in other app version): In “Sign Up” page, fill in name and email. Click next. Rate your preferences. Click done.
1. Scroll through the “Home” page to view recommended videos. Note the “Home” page loading on both the mobile device(all recommendations) and LD screen(top recommendations).
2. **Filtering:** On the mobile device “Home” page, to filter your choices, “swipe right” videos you like. As you do the swipe right, notice the video being removed from the mobile device Home page, and added to the filter page on the LD screen.
3. **Details:** on the mobile device “Home” page, “swipe left” any video you like. Note that the video details are transferred to the LD screen. On the mobile device, click the detail indicator “>” to view the video details.
4. Investigate the video details (on both or either of the 2 displays).
5. **Playing video:** While on “Details” page, tap and drag the video image to the bottom of the page. The video should start on the LD screen.
6. **Rating:** on the mobile device, the rating page should appear once the video starts playing. Rate the video while watching or after watching.
7. Optional: If done with rating while watching the video, optionally go back to the Home view on the mobile device and select other videos to filter, view details, or play.
